

**Clean Version of Pending Claims 38 to 43; 62; and 60**

38 (Not Amended). A kit comprising  
tubing adapted to be coupled to a blood constituent source to convey blood constituent,  
a transfer container coupled to the tubing,  
a source of photoactive material to be mixed with the blood constituent, and  
an overwrap enveloping at least a portion of the kit and including light filtering material  
that absorbs light that activates the photoactive material.

39 (Not Amended). A kit according to claim 38  
wherein the photoactive material includes methylene blue.

40 (Not Amended). A kit according to claim 39  
wherein the light filtering material includes a blue material.

41 (Not Amended). A kit according to claim 40  
wherein the blue material includes phtalocyanine pigments.

42 (Not Amended). A kit according to claim 38  
wherein the photoactive material includes psoralen.

43 (Not Amended). A kit according to claim 42  
wherein the light filtering material includes a red material.

62 (Once Amended). A kit according to claim 38  
wherein the overwrap envelops the entire kit.

70 (Once Amended). A kit according to claim 38 further including  
wherein the tubing includes a first filtration media to separate a first cellular blood  
species from the blood constituent conveyed from the blood constituent source, and  
wherein the tubing also includes a second filtration media in series with the first filtration  
media to separate a second cellular blood species from the blood constituent conveyed from the  
blood constituent source, to thereby produce a filtered blood constituent that is essentially free of the  
first and second cellular blood species.
